(continue to p.4 for more details)*

## *New hire in the US office!*

It gives us great pleasure to introduce our new SR Contract Specialist Mr. George S Georgy in Tego Texi Tectum US office.

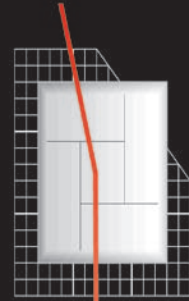

Mr. Georgy comes to us with a strong background in Operation Management, Project Management, Cross function Team Coordination and involved in many large scale projects in design and building of US Army and Department of Justice Facilities. Mr. Georgy is a very detailed oriented individual with significant operational skills and strong technical experiences. We are pleased to welcome Mr. Georgy on board and to have the following interview with him;

### **1. How do you see Tego of an added value to you and to your career path?**

Working with Tego has contributed to my skills and career path in many aspects. The friendly and encouraging environment from both the staff and managerial levels help me in improving my skills and talents and assist me in realizing the potential of my professional career. Also, Tego is giving me the opportunity and support to take a new direction in my professional life and to follow my passion in business development and contracting.

### **2. What's your plan for adding to Tego's Legacy?**

As a matter of fact, Tego is not only an accomplished company that has been in the business for years; but also it has a great potential to grow and expand. In my perspective we, in Tego, have all the ingredients for the recipe of success in terms of quality, price and time management. However, we need to represent ourselves in the market more aggressively especially in the Americas and Europe markets. I will be working very hard not only to take Tego to the next level in the US; but also escalating us into the real business in Europe and Latin America.

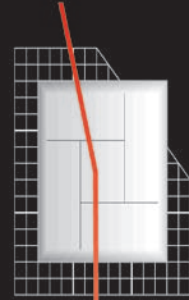

### 3. Working in Tego's US office, highlight for us the main goals and achievements the US office has been through thus far?

- + At Tego's US office, we established the resources and tools to compete in the US open market, as well as a registered prime contractor with the US government;
- + Currently, we are on the verge of ending the process of getting our solutions certified against the up-to-date major standards in the US and worldwide;
- + Additionally, we are planning on expanding and improving our R&D to meet the exceeding market demands;
- + Moreover, to render the US office the base for future Europe and Latin America offices.

**We thank Mr. Georgy for his time and his accomplishments thus far.**

**Tego Texi Tectum**

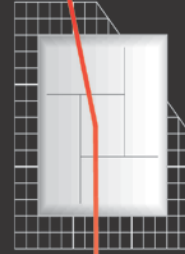

## *Tego's Awards are Back!*

Tego Texi Tectum is pleased to announce its valuable clients; it has been awarded in 4 projects from the US Government. Tego provided the US government with quite reasonable quantity of PASGT helmets level IIIA in different projects; project 177, project 196, project 197 and project 205.

Tego Texi Tectum is working on developing couple of new plates solutions of a light weight with multi hit capabilities; in addition to the continuous work of the R&D department in getting new technologies of light weight helmets.

Tego Texi Tectum is always looking for embracing the client's needs, goals, and strategies to provide stability and development solutions that are individually tailored to each client in an efficient and cost-effective manner. We work, You relax!
